NEWS RELEASE

ECHO ENERGY ANNOUNCES NEW DRILLING IN THOROLD GAS ZONE

London, ON – September 13, 2007 - Echo Energy Canada Inc (EEI: TSXV-Tier 1) is pleased to announce that after successful flow testing of another Thorold/Grimsby as announced in our press release of September 5, 2007, the company has applied and received 4 new licenses, ECHO 60 to 63, to drill gas wells and has already commenced its drill program on “ECHO 61”.

Drilling on these new holes, all located in Bayham Township, starting with “ECHO 61” which has already been commenced on September 5, 2007. The results will be analyzed by (JMPEL) Jim McIntosh Petroleum Engineering Ltd., Echo’s consulting petroleum engineer. Results of the drill program will be released as soon as they are made available by the engineering company.

“We are extremely pleased to be drilling more wells in the prolific Thorold/Grimsby zone,” stated Mr. Gary Conn, President and CEO of Echo Energy. “The latest results from this zone have all been favourable, that is, in the upper region of the “average” producing rate from Thorold/Grimsby gas wells in the area which has been 20 to 100 Mcfd (thousand cubic feet per day).”

Investors are also asked to visit the Echo Energy IR Hub at <http://www.agoracom.com/IR/EchoEnergy> where they can post questions and receive answers or review questions and answers already posted by other investors. Alternatively, investors are able to e-mail all questions and correspondence to EEI@agoracom.com where they can also request addition to the investor e-mail list to receive all future press releases and updates in real time.
